

SOCIAL DISTANCING MEASURES FOR SPORT IN SCHOOLS

Issue Date: Tuesday 23rd June 2020

This document sets out what Team V Sport Ltd will do to keep children during any of our sports sessions. These measures have been put into place following guidelines from the government and other sporting governing bodies. Our measures will be reviewed on a regular basis to stay in line with advice from the school and government.

Our number one priority is to deliver fun and engaging sport sessions whilst keeping the children and coach(s) safe. We will reinforce 2 metres of social distancing throughout the session.

Before the session / activity

- The coach will set up and use easily cleanable equipment (i.e. plastic bats / plastic balls)
- The coach will use an antibacterial disinfectant to wipe down all equipment before use
- All equipment will be set up separately to avoid sharing and cross-contamination

During the session / activity

- When children arrive they will go straight to their allocated set of equipment that they will be using throughout the session
- The children will go through a circuit of various challenges for the duration of the session.
- There will only be a maximum of 3 children at any station
- Children will not need to share any equipment throughout the session
- We will avoid queuing throughout the duration of the session

After the session / activity

- Children will return back to their starting position from where they will be collected
- The coach will wipe down all equipment used at the end of the session
- The children be asked to wash their hands thoroughly
- If children are being collected by parents – they will be allowed leave as soon as their parents arrive to avoid any waiting / queuing.

First Aid / Toilet breaks

- The coaches will wear a face mask and gloves if needed to administer any form of first aid.
- Children will be allowed to go to the toilet 1 at a time and will be reminded to wash their hands thoroughly
- Toilets will be disinfected regularly throughout the day.
